SOFTWARE ENGINEER

I am a software engineer with over **3 years** of experience. I have worked with various languages including **C++**, **Go**, Python, etc. I am interested in large-scale complex systems, computer architectures, data structures, and algorithms.

EDUCATION

VNU - University of Engineering and Technology

Ha Noi, Viet Nam | Jul 2019 – Sep 2023

GPA : 3.84 - ranked 4th in my major.

Programming : Fourth prize in Vietnam National Olympiad in Informatics - VNOI 2018.

EXPERIENCE

Software Engineer - Google

New Taipei, Taiwan | Oct 2025 – Present

- Develop a platform with drivers and tools to enable validation of Google Tensor.
- Create and integrate software on emulation, FPGA and Silicon environments.

Software Engineer - NVIDIA Vietnam

Ha Noi, Viet Nam | Jun 2025 – Aug 2025

- Develop and deploy, support the automation build process of NVIDIA Inference Microservices (NIM).

NPU Engineer - Moreh Vietnam Company Limited

Ha Noi, Viet Nam | Dec 2023 – Jun 2025

- **Contribute to AMD's and Tenstorrent's open-source libraries MIOpen, tt-metal** by developing highly tuned implementations for standard deep learning operations using AMD GPUs and Tenstorrent NPUs.
- Implement and optimize various tensor operations such as matmul, softmax, dropout, etc. on Tenstorrent NPU. Our team was among the first worldwide to successfully train large language models, including GPT-2 and Mistral, on an NPU device.
- Optimize an inference serving system for multi-billion parameter language models using multiple distributed GPUs, utilizing various techniques such as data parallelism and pipeline parallelism.
- Obtained skills: C++, Python, CUDA, HIP.

Software Engineer - Technology Joint Stock Company Vietnam TEK0

Ha Noi, Viet Nam | Aug 2022 – Dec 2023

- Develop and operate a service that **stores data of over 10 million** users, capturing details such as transaction amounts and their most recent transactions, along with their online behavior including page views and interactions with commercial banners in **nearly real-time**. Using these data, we automatically classify customers and implement customized marketing campaigns for each customer segment.
- Obtained skills: Go, gRPC, Microservices, Column-oriented database, React.

PROJECTS

Personal project

C++

On-going - [Source Code](#)

Created a dynamic type programming language from scratch: variable, scope, statement, branching, loop, etc.

Personal project

Golang, Redis, PostgreSQL.

[Source Code](#)

A custom plugin that can be integrated with Kong API Gateway to parse, build the Abstract Syntax Tree then cache GraphQL request routing through Kong API Gateway using Redis. Prometheus & Loki are integrated to manage the plugin state and log.

Team project

Unity, C#

[Source Code](#)

A Unity-powered Chinese chess game featuring 3D graphics, designed for immersive VR headset play. The game also includes support for voice commands and mouse control.

TECHNICAL SKILLS

Languages : Golang | C++ | Java | Javascript | Python | PHP

Others : MySQL | Redis | React.js | Vue | Laravel | Flask | gRPC | Docker | Git | Grafana
